- (Currently Amended) A construction management system, comprising:

 a handheld computer adapted to collect construction data from the field, wherein

 the handheld computer collects information on equipment type, quantity, hours in use and
- a planning system to track budgetary information that manages multi-year budgets;
 - a design system to perform site engineering assessment; and
- a construction system to track material consumption and progress for each project, the construction system adapted to receive data collected from the handheld computer;

wherein the information is transmitted in real time to the construction system to provide up-to date-reporting, wherein new equipment added in the construction system is automatically displayed on the handheld computer, and wherein an electronic signature is captured and displayed in a construction system report.

- (Original) The system of claim 1, wherein the handheld computer collects work in progress data.
- (Original) The system of claim 1, wherein the handheld computer collects
 project and contract identification, inspector identification, item number,
 location, and one or more description of activities.
 - 4. (Original) The system of claim 1, wherein the handheld computer collects labor related information.

- (Original) The system of claim 1, wherein the handheld computer collects
 labor type, quantity and hours.
- (Original) The system of claim 1, wherein the handheld computer collects equipment information.
- 5 7. (Canceled).

- 8. (Original) The system of claim 1, wherein the handheld computer collects submittal information.
- (Original) The system of claim 1, wherein the handheld computer collects weather condition, comments, and an inspector name.
- 10 10. (Original) The system of claim 1, wherein the handheld computer sends collected information to a server.
 - 11. (Original) The system of claim 10, wherein the collected information is sent wirelessly using a wireless handheld unit.
 - 12. (Original) The system of claim 10, further comprising a modern coupled to the handheld computer, wherein the information is transmitted using a modern.
 - 13. (Original) The system of claim 10, further comprising a hot-sync cradle coupleable to the handheld computer, the cradle hot-syncing the collected information for transmission to a server.
- 14. (Currently Amended) A method for managing a construction project,
 20 comprising:

collecting construction data from the field with a handheld computer, wherein the

handheld computer collects equipment type, quantity, hours in use and stand-by hours;

tracking budgetary information using a planning system;

performing site engineering assessment using a design system; and tracking material consumption and progress for each project using a construction system, the construction system adapted to receive data collected from the handheld computer, wherein the information is transmitted in real time to the construction system to provide up-to date-reporting, wherein new equipment added in the construction system is automatically displayed on the handheld computer, and wherein an electronic signature is captured and displayed in a construction system report.

- 15. (Original) The method of claim 14, further comprising collecting work in progress data using the handheld computer.
 - 16. (Original) The method of claim 14, further comprising collecting labor related information using the handheld computer.
 - 17. (Original) The method of claim 14, further comprising collecting equipment information using the handheld computer.
- 15 18. (Original) The method of claim 14, further comprising collecting submittal information using the handheld computer.
 - 19. (Original) The method of claim 14, wherein the handheld computer collects project and contract identification, inspector identification, item number, location, one or more description of activities, labor type, quantity, hours, weather condition, comments, and an inspector name.
 - (Original) The method of claim 14, further comprising sending collected information to a server over land-line or wireless medium.
